

Don't litter!
Keep our ocean clean for the critters.

Once a single cigarette is littered near the ocean it pollutes 5 gallons of water. Do you really want to be the cause of the death of some harmless sea life? It takes a decade or more to decompose in the ocean. And cigarette butts have long been the single most collected item on the world's beaches. In the past 32 years, 60 million cigarette butts have been collected total.

The most littered item in the world is cigarette butts.
